ORAL LIQUID

500mL

AUST. L 113891

Olive Leaf Australia is a new breed of international health company. We're not located in a multi-storey, inner-city office block, but in the peace and quiet of an Australian olive grove. Our back-to-nature philosophy, and rigorous scientific testing, guarantees the freshness and effectiveness of our extracts.

Olive leaves have been used widely in the traditional remedies of many nations, including for fever relief. They also help to maintain a healthy cardiovascular system and normal heart function.

Aloe Vera helps to maintain a healthy immune system and a healthy digestive system, and is also used to relieve constipation.

The liquid extract in this bottle contains a range of very powerful cell-protecting antioxidants and is made **directly** from **fresh-picked** olive leaves.
